

What is the difference between 390 and 389 battery?

389 is a high drain SR1130W battery, used in watches with extra motors, alarms, and lights. 390 is a low drain SR1130SW battery used in analogue watches with no extras. LR batteries, such as the one in a 389, are alkaline and have less capacity than SR or silver oxide cells. Do not use an LR cell in a watch unless it's something cheap or you don't care about it.
