

How do I install my GivEnergy battery system?

Your GivEnergy battery system must be fitted by an approved installer. The installer will talk you through appropriate installation locations when they come to assess your project. When it comes to positioning, the battery storage system is designed to be wall mounted or ground mounted, and always kept in an upright position.

Should you add a battery to your home?

Adding a home storage battery means you can get the most from your renewables and enjoy cheap energy morning, noon, and night. Plus, this concept of consistent low-cost energy also applies during outages. With domestic battery storage, you can protect your supply from disruption, keeping your home powered even when the grid is down.

How does a home battery storage system work?

An installer would simply come and fit your domestic battery storage system, adding an AC coupled inverter to communicate between solar PV, the battery, and the home. So, the power from your existing solar array will charge the battery, the battery will supply the home, and any leftover energy is sent back to the grid.

Can a battery system be installed in a garage or outbuilding?

In general though we always recommend installing batteries and associated equipment inside a garage or outbuilding for the best solution for ongoing access and maintenance. Ideally, you will need a 2m wide x 2m high wall space to be able to fit the battery system at your home.

How long does it take to install a battery storage system?

When outdoors, it should be housed beneath a canopy. With any installation - indoors or outdoors - your installer should leave adequate clearance around the system for ventilation. Generally, your installer will be able to fit and commission your domestic battery storage solution within a single day.

How do I get a new battery?

It's that simple. Use Rheingold (ISTA-D) to REGISTER and/or CODE a new battery. The virtual machine, mentioned above, comes pre-loaded with this dealer level software. An ICOM emulator is all setup for you to use this program with the aforementioned K+DCAN cable.
