

What is an integrated battery cabinet (IBC)?

The Integrated Battery Cabinet (IBC) is available in two model to meet the needs of the Eaton 93PM UPS product line. UPS. IBC-L output protected by 300A circuit breaker. IBC-LH output protected by 500A circuit breaker. The recharge date is also stated on a label inside the IBC.

How do you connect a battery interface to an IBC?

Install the conduit plate and install all conduit runs into the plate. Pull the wiring through the conduit into the wiring area. In multiple IBC installations, route the battery interface wiring between IBCs through the top of the adjacent IBC using the top inter-cabinet access pass-through (see Figure 4-2). Proceed to Step 9. Bottom Entry Wiring.

Does the IBC-LH have a battery cabinet?

In addition, the IBC-LH provides a single battery cabinets solution for 93PM UPS systems 200 kW and below. 93PM 400 kW UPS systems above 200 kW require at least two battery cabinets. The IBC-L and IBC-LH are housed in a single free-standing cabinet with safety shields behind the doors for hazardous voltage protection.

What is a Legrand Battery Cabinet?

Universal battery cabinets for all three-phase Legrand UPS from 10kVA up to 800kVA power range. The Battery cabinet is designed to house standard VRLA Batteries of capacity range from 24Ah to 105Ah (C10).

What is a battery interface box (BiB)?

The BIB is available in various variants: 12V350A, 24V350A, 48V350A, 12V600A, 24V600A and 48V600A. The Battery Interface Box (BIB) is a device capable to connect and disconnect a battery or a battery bank to a load / charger (DC bus) with the intent to protect the Li-ion battery or battery bank against improper use.

Where is the battery cabinet located?

The battery cabinet may be located to either the right or left of the UPS cabinet. The recommended location is to the right of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet. 21.
