This is a gnome-shell extension that moves the top panel to the bottom. Not having a top panel is very helpful when using applications like Chrome (for accessing tabs with mouse). However, hiding the panel isn't a very elegant solution to this as the panel holds very useful information such as the time, battery status and with some extensions, weather, lock key status etc.

(Important: The controller, battery touch metal pieces and other parts are not included.) Easy to install: Simply disassemble your original backplate from the controller, then replace it with eXtremeRate shell; Get the installation video ...
