

How do I choose a battery tray?

When selecting a battery tray, make sure it is compatible with your car's battery size and type, and that it meets your specific needs. Buy a new battery box from JEGS. Use a battery mount to move a vehicle's battery to a better location. We have battery boxes and relocation kits that will be great for the job.

What is a battery tray?

It is a tray that the battery sits on. The battery is held in place with a set of metal tie-downs, and bolts go through holes in the battery tray or a set of straps. The purpose is to keep the battery in place, but it also reduces engine and road vibration on the battery, reducing the battery's performance.

How do you put a battery tray on a car?

Make sure that it has a snug fit. Use the hold-down bar or straps to secure the battery firmly to the tray. Hook up the battery cables to the battery posts, and you are ready to go. Will a universal group battery tray fit all vehicles?

What is a universal battery tray?

Whether you want to replace your old battery with one from a different battery group or your battery tray is worn out, this is a quality universal tray. It is made from stainless steel and includes everything that you need to put it in place and install the battery. It is recommended for marine use.

Do I need a battery tray?

To determine if you need a car battery tray, check your vehicle's specifications and whether it originally included one. If in doubt, it's advisable to use a battery tray for added safety and protection. How Much Does a Battery Tray Cost? The cost of a battery tray can vary depending on factors such as brand, material, and design.

Where should a battery tray be located?

Horizontally and perpendicular to the boat's center line- the given amount of pressure for one minute on both the starboard and port sides. When choosing a location for the battery tray, you must be aware that the tray and battery must not be directly above or below a fuel tank, filter, or fuel line.

This battery tray fits into the battery box of all Defenders, it is also a universal fit for other applications and will take many different batteries up to 180mm wide & 200mm tall.
