

Where will lithium batteries be made in Buenos Aires?

State company Y-TEC, the tech arm of YPF, will open the first lithium battery cell factory in September, in La Plata, the capital of Buenos Aires province. Another plant, five times bigger, will kick off in Santiago del Estero in 2024.

How many people can a lithium battery power Buenos Aires?

The plant will generate 15 megawatts per year, which means it will produce lithium batteries capable of powering 2500 households. The batteries are envisaged for use in rural areas. For example, there is already a Buenos Aires province-backed project to supply the Paulino-Berisso island, home to 70 families who are currently off the power grid.

Can Argentina start a battery industry?

The bill to develop the value chain of lithium and batteries, as it reads on the draft, hopes that Argentina can start by joining the industrialization of a few elements, such as cathodes and battery cells, and only then start producing batteries in the mid-term.

Will Argentina turn lithium into battery chemicals?

Argentina, Chile, Bolivia and Brazil plan to coordinate action on turning more of the region's mined lithium into battery chemicals, as well as moving into manufacturing of batteries and EVs, according to Argentina Mining Undersecretary Fernanda Vila.

What is happening in Argentina's lithium sector?

Jose Hofer, lithium battery specialist at consultancy SC-Insights and former analyst at Chile's Ministry of Mining: "What we are witnessing today in Argentina's lithium sector is the result of three decades of consistent investment and exploration in the space.

Will a new Lithium Project churn out in Argentina?

Four new projects will finally begin to churn out lithium in the weeks and months ahead, according to a yet-to-be released federal government time-line seen by Bloomberg News. That will almost double production capacity in Argentina, whose growth potential has long lured the attention of battery makers around the world.
