

Is a UK battery storage facility backed by Chinese investors?

The British government has approved a major battery storage facility in the UK, which is backed by a joint venture involving US investment giant Blackrock and KX Power, a UK-registered asset manager with ties to Chinese investors.

Will China's biggest electric car battery manufacturer spend billions on UK Gigafactory?

The Department for Science, Innovation and Technology was contacted for comment. One of China's largest electric car battery manufacturers is set to spend billions on the UK's biggest gigafactory, reports suggest.

Could a Chinese diplomat build Britain's biggest battery storage facility?

A project led by a former Chinese diplomat to build one of Britain's biggest battery storage facilities has been given the green light after a national security review. Pat McFadden, the Chancellor of the Duchy of Lancaster, last week approved a deal for a joint venture to develop an 80-megawatt storage plant near Grimsby.

Why is the UK investing in battery manufacturing?

The UK government is committed to continuing to invest in UK battery manufacturing. This strategy builds on our impressive track record of targeted government support, leading to a pipeline of investments through the battery ecosystem:

Should the UK become 'overly reliant' on Chinese battery technology?

Last year, UK business secretary Kemi Badenoch warned that, in the interest of national security, the nation must not become "overly reliant" on Chinese battery technology. EU politicians also share these fears as EVE is in the process of building several European battery factories, notably in Hungary.

Why should we invest £38 million in the UK battery Industrialisation Centre?

Invest an additional £38 million to enhance the UK Battery Industrialisation Centre development facilities, boosting its capability for research and development in new chemistries and future technologies. This builds on our know-how in lithium-ion solutions and enables the scale-up of emerging innovations.
