

Sell Your Solar is the smartest of all the solar buyback solutions in Britain. We offer a quick and easy process so you can focus on what really matters - enjoying free solar energy. Our buyback offer allows you to cash in on your feed tariff, enjoy a lump-sum payment now, in exchange for your future FiT income.

The buyback rate is when the electricity company credits you for the excess energy your solar panels generate. Compare different plans to find the one that offers the most competitive buyback rate.

Solar Buy Back is a process whereby a solar Feed-In Tariff is a form of credit received for the excess solar power generated by your system that is then exported back to the grid in your house. Feed-In Tariffs are typically between 9 and 15p per kilowatt-hour (kWh).

If your home already has solar, it's time to Shine! At Chariot Energy, we have energy plans available for you to sell us your excess solar generation. My home has solar panels. My home has no solar panels.

In this article, we will look at how to sell electricity from solar panels, how payments work and how much money you could make sending your excess solar energy back to the grid in the UK.

An increasing number of commercial solar specialists are offering owners of solar photovoltaic ("PV") arrays on their homes and businesses a lump sum payment in exchange for the right to claim the FiT.

Whether you have solar panels on the roof of your home, a solar farm, a commercial installation, or even a portfolio of all these, we have the expertise and infrastructure you need to realise your investment.

Monitor Energy Prices: Stay updated with the latest tariffs and switch suppliers if necessary to get the best rates. **Invest in Energy Storage:** Battery storage systems can allow you to store excess electricity and sell it back to the grid during peak times, potentially earning you a higher rate. **The Environmental and Financial Benefits**

Are free solar panels a good idea? We take you through the pros and cons of such schemes and give you advice on what your options are if you can't afford to buy solar panels outright. Plus we look at how solar buyback (also known as solar equity release) schemes work, and whether they're a good idea if you already have solar panels.
