

How has the new energy vehicle power battery Patent Cooperation network evolved?

Phased evolution of the patent cooperation network: From 2008 to 2021, the evolution of the new energy vehicle power battery patent cooperation network presents significant phased characteristics, which not only reflect the rapid development of technology but also reflect the deepening of the industry-university-research cooperation mode.

What are the stages of China's new energy vehicle power battery Patent Cooperation?

Based on this, China's new energy vehicle power battery patent cooperation can be divided into three stages: Stage 1: 2008-2011. The number of collaborative patent applications for new energy vehicle power batteries increased from 4 in 2008 to 72 in 2011, indicating a consistent trend of growth.

Are new energy power battery patents cooperating in different provinces?

Subsequently, a thorough analysis is conducted to examine the spatial patterns of patent cooperation within each province specifically about new energy power batteries. Figure 4 shows that the total number of provinces involved in new energy power battery patent cooperation is increasing throughout the three stages.

Do new energy vehicle power batteries have cross-regional cooperation?

Using the ArcGIS software and the natural break point method, the intensity of cross-regional cooperation for new energy vehicle power batteries is divided into three levels, and the spatial pattern of patent cooperation is analyzed.

What is China's cross-regional cooperation in New energy vehicle power batteries?

This reflects the distinct spatial characteristics of China's cross-regional cooperation network in new energy vehicle power batteries. The focus of cross-regional cooperation is on cities with strengths in talent, capital, and technology, such as Guangdong, Jiangsu, and Shanghai.

How can future research help China's new energy vehicle power battery industry?

Future research can strengthen the research on international cooperation networks, including the analysis of international patent cooperation mode, characteristics, and trends, to provide broader development space and cooperation opportunities for China's new energy vehicle power battery industry. Data will be made available on request.

Considering the supply chain composed of a power battery supplier and a new energy vehicle manufacturer, under the carbon cap-and-trade policy, this paper studies the different cooperation modes between the manufacturer and the supplier as well as their strategies for green technology and power battery production. Three game models are constructed and ...

# Conversion equipment battery enterprise cooperation

Battery electric vehicles (BEVs) are being adopted by fleet owners across the globe. ... thorough upfront planning in five key areas will bolster electric fleet conversion success. Grid capacity and charging equipment. Utility-side ...

Global Energy Interconnection Development Cooperation Organization, Beijing, People's Republic of China. Search for more papers by this author. ... PV and battery ...

a reference for enterprises to formulate cooperation strategies. However, there is a large number of patents in the patent market that have no ... battery industry, the literature on new energy power batteries from the power battery cooperation patent is still insufficient, and few scholars in the existing research have ...

(2) Each main equipment is equipped with frequency conversion equipment, which can save 10-15% of electric energy, and can reduce mechanical equipment failures, and save energy consumption while ensuring continuous production; ...

To deeply analyze the cooperative patent application and distribution trend in the field of power batteries, this paper collects the patent cooperation data of China's new energy ...

Through business cooperation and innovation, both parties will achieve leapfrog development together, realize the consolidation across channel-building of battery swappable EVs, battery ...

Western battery equipment manufacturers expect to have a 20 % global market share by 2030, representing a market opportunity worth EUR 85 billion. To surpass Asian competitors, it is ...

Conversion Equipment BATTERY PACKS Standard ECK conversion kits are supplied with 4Ah "D" size high temperature Nickel Cadmium cells in stick format although side by side packs are also available. For the ECK635/LP & ECK680/LP Low Profile kits, battery packs made up of two 3cell sticks using 4Ah A-size Nickel

The integration of perovskite thin-film solar cells and full-category air film technology opens a new chapter in new energy! As a leading enterprise in the precision manufacturing of domestic flexible perovskite thin-film batteries, Dazheng Micro-Nano actively promotes the collaborative cooperation of the photovoltaic industry upstream and downstream, committed to providing ...

Research on the Quality of University-Enterprise Patent Cooperation: Based on the Analysis of Chinese University Enterprise Patent Cooperation Data July 2023 DOI: 10.2991/978-94-6463-192-0\_2

6 ???&#0183; Second, the highly asset-intensive nature of battery production, with equipment depreciation and amortization contributing significantly to conversion costs, underscores the ...

## **Conversion equipment battery enterprise cooperation**

The signing ceremony of the university-enterprise cooperation and teaching practice base between the institute of materials science and engineering, zhejiang 0086-571-81107039, 0086 ...

A Spanish company specialized in modular design of battery packs and powertrain for electric vehicles is looking for potential partners in order to apply for European projects focused on electric mobility and sustainable technologies applied to vehicles. ... The company is also considering the possibility of a technical cooperation in order to ...

UEERE0078 Install battery storage to power conversion equipment Date this document was generated: 29 November 2024 Approved Page 5 of 5 &#169; Commonwealth of Australia ...

On November 22nd, the signing ceremony for the tripartite cooperation agreement between CATL, Changan Auto, and CAES on battery swapping project cooperation was held in Chongqing. It was announced that the Changan Auchan 520, the first EV model powered by the new generation of Choco-Swap battery block, and the new generation of the ...
