

Can you recycle a battery?

Reduce fire risk and save precious resources by recycling your batteries. Common household batteries include lithium-ion button batteries from watches, hearing aids, etc, as well as standard barrel-type batteries (AAs, AAAs and so on). You must recycle these household batteries at dedicated battery collection points.

How do you dispose of a leaking battery?

To dispose of leaky batteries, you should first put them in a clear plastic bag and seal it to prevent anyone from coming into direct contact with these hazardous materials. Then you can dispose of the leaking batteries the same as any old batteries - in a battery recycling bin at a supermarket, recycling centre, or via collection.

Where can I dispose of old batteries?

These include disposing of AA and AAA batteries, 9v batteries, watch, camera, and electric toothbrush batteries. Recycling centres - lots of household waste recycling centres (HWRCs) also have battery bins for recycling. Check with your local authority to see if your nearest HWRC accepts old batteries.

How do I stop battery disposal problems?

Handled correctly, lithium batteries are a huge step up over other batteries, so it's really important to make the correct decision when disposing of batteries. The best way to stop battery disposal problems is to cut down on the amount and frequency you dispose of them.

Should batteries be disposed of in general household waste?

Batteries should not be disposed of in general household waste; instead, they should be collected separately to ensure the correct treatment and recycling of the substances they contain. Battery recycling ensures the recovery of these materials and prevents any potentially harmful effects on both the environment and human health.

Can you dispose of car batteries in a rubbish bin?

By law you mustn't dispose of car batteries in a rubbish bin. In the UK you can recycle car batteries at designated collection points. These include many household waste recycling centres, garages and scrap yards. Or, if a specialist is replacing your car battery, they might be able to dispose of the old one safely for you.
