

How do solar panels work in the UK?

Installing solar panels lets you use free, renewable, clean electricity to power your appliances. You can sell extra electricity to the grid or store it for later use. There are over 1.3 million installations on homes across the UK - see where the UK solar panel hotspots are. Let's look at how they work and whether they're suitable for your home.

How does a photovoltaic system work?

A photovoltaic system consists of one or more solar panels, an inverter that converts DC electricity to alternating current (AC) electricity, and sometimes other components such as controllers, meters, and trackers. Most panels are in solar farms or rooftop solar panels which supply the electricity grid.

What are the different types of domestic solar panels?

Domestic properties usually include houses, flats, and bungalows that may be privately owned, rented, or leased. Depending on the property type, there are two options for domestic solar panel installations: roof-mounted and ground-mounted solar panels.

What are the regulations for installing solar panels in the UK?

Whether you're installing on a residential roof or a larger property, let's take a look at some of the regulations for installing solar panels in the UK. Arguably, the most important regulations for those looking to install solar panels on their property are those that consider the placement or positioning of the solar panels.

What are the regulations for installing solar panels on your property?

Arguably, the most important regulations for those looking to install solar panels on their property are those that consider the placement or positioning of the solar panels. These vary depending on whether your property is for commercial or domestic purposes.

Do I need permission to install a solar panel?

Generally, any solar panel installation under 1MW is permitted without any additional approval required. Similarly to domestic installations, for no permission to be requested, there are several regulations to be met for commercial solar panel installations.
