

Dominican Republic's new energy battery industry policy

What is the Dominican Republic's Energy Future?

The Dominican Republic has several main objectives for its energy future. It wishes to supply growing demand for energy securely and affordably, ensure actors involved in the power sector make a profit, meet power supply quality standards and shift to a lower-carbon system.

Can renewables meet the demand for new electricity in the Dominican Republic?

If renewables could meet the demand for new electricity, the transport sector's renewables share would increase accordingly. Biomethane is another potential technology option in the Dominican Republic transport system but no production has taken place yet. Today, more than 15 000 natural gas vehicles refuel at 27 service stations.

Does the Dominican Republic still need energy?

According to a CNE study (Cruz Castillo, 2014), around 12% of Dominican Republic households still lack modern energy access for cooking, relying mainly on wood fuel and charcoal. Although demand for traditional forms of bioenergy declines significantly, the Reference Case also indicates it persists in 2030.

What is AES Dominicana - battery energy storage system?

The electro-chemical battery energy storage project uses lithium-ion as its storage technology. The project was commissioned in 2017. The AES Dominicana Andres - Battery Energy Storage System was developed by Fundacion AES Dominicana. The project is owned by The AES (100%).

What role does the Dominican Republic play in transforming energy consumption?

As one of the largest energy users in the Caribbean, the Dominican Republic plays a critical role in transforming the region's energy consumption. The Dominican Republic has implemented institutional and operational changes in its energy sector, including the formation of the Ministry of Energy and Mines (MEM) in 2013.

What is the first solar-plus-storage project in the Dominican Republic?

Construction has started on the first major solar-plus-storage project in the Dominican Republic, which features a 24.8MW/99MWh battery energy storage system (BESS). The Comisi#243;n Nacional De Energia (CNE) of the Dominican Republic announced the start of work on the Dominicana Azul solar project shortly in late December (22 December).

The stakeholders estimated that by 2028, the Dominican Republic will need to deploy between 250 to 400 MW of energy storage systems. Their projection is based on the country's current renewable energy market.

Zenith Energy Corp SRL, a subsidiary of Blacktree Capital Management, has initiated construction of the
