The capacitance per unit length of coaxial cable ("coax") is an important property of the cable, and this is the formula used to calculate it. This page titled 5.3: Coaxial Cylindrical Capacitor is shared under a CC BY-NC 4.0 license and ...

Gauss's law is that the total (D)-flux arising from a charge is equal to the charge, so that in this geometry ( $D = \sigma$ ), and this is not altered by the nature of the dielectric materials between the plates. Thus, in this capacitor, ( $D = CV_0/A = ...$

We consider electric double layer capacitors (EDLC) composed of spherical cations and anions in a dielectric continuum confined between a planar cathode and anode. The model system includes steric as well as ...
