

Which capacitors are in stock at Mouser Electronics?

Capacitors are in stock with same-day shipping at Mouser Electronics from industry leading manufacturers. Mouser is an authorized distributor for many capacitor manufacturers including KEMET, KYOCERA, AVX, Murata, Nichicon, Panasonic, Taiyo Yuden, TDK, Vishay and many more.

What is a capacitor used for?

Capacitors play a key role in almost all electrical and electronic equipment and electrotechnical installations. These versatile components store electric charges and smooth or buffer currents and voltages. They are used to filter and suppress HF interference as well as to decouple signals in telecommunications applications.

What is the capacitance of an electrolytic capacitor?

Depending on the technology and applications, capacitors are manufactured for voltages from a few to over 10 000 volts. Their capacitance values extend from picofarads to the lower farad range. Aluminium electrolytic capacitors offer very high capacitance values per unit volume over a wide range of rated voltages.

What are aluminium electrolytic capacitors?

Aluminium electrolytic capacitors offer very high capacitance values per unit volume over a wide range of rated voltages. They are based on aluminium films whose surface has been enlarged by an etching process.

Can polymer aluminum electrolytic capacitors operate reliably at 450 V?

This article is introducing polymer aluminum electrolytic capacitors technology that operates reliably at high voltages at 450 V. This will...

Which capacitor has the highest capacitance to volume ratio?

Tantalum capacitors have the highest capacitance to volume ratio of all capacitors due to their specific monolithic construction and as well as mechanically very robust component structure. They are available in various packages as chip, molded SMD or leaded dipped or leaded axial.

Capacitors play a key role in almost all electrical and electronic equipment and electrotechnical installations. These versatile components store electric charges and smooth or buffer ...
