Will European Commission impose anti-dumping duties on Chinese solar panels?

The European Commission today decided to impose provisional anti-dumping duties on imports of solar panels and key components (i.e. cells and wafers) from China. An investigation found that a Chinese solar panel is sold to Europe far below its normal market value.

When do EU anti-dumping and anti-subsidy measures on solar panels expire?

"The EU anti-dumping and anti-subsidy measures on solar panels from China will expire today at midnight (2200 GMT)," the commission said. EU producers of solar panels had complained about underpriced Chinese imports. Photo: Reuters

Will the EU end its five-year-old restrictions on solar panel imports?

The European Union will end its five-year-old restrictions on solar panel imports from China, officials said on Monday, as Brussels and Beijing increase their own trade cooperation in the face of protectionist steps from the United States.

Does the EU impose a dumping duty on solar panels?

the imposition of measures is not against the Union interest. On the basis of these findings, it has been decided to impose an anti-dumping duty in a two-staged process: for two months, a duty of 11.8% will have to be paid, whereas from 6 August, duties ranging from 37.3% to 67.9% (averaging 47.6%) will be levied on solar panels from China.

Are European solar panels on the brink of a global overcapacity?

Global overcapacity amid US and Indian trade curbs on China have distorted the European market &#169; Bloomberg Brussels is considering emergency support measures for Europe's solar panel manufacturing industry as a flood of cheap Chinese imports threatens domestic production and industry figures warn the continent's manufacturers are "on the brink".

What anti-dumping complaints has the European Commission received?

In terms of import value affected, this is the most significant anti-dumping complaint the European Commission has received so far: in 2011, China exported solar panels and their key components worth around EUR21 billion to the EU.

The European Commission, the EU's executive arm, suggested the decision would boost the bloc's renewable energy goals as it rejected an appeal from the European ...

- In place for nearly 5 years, EU anti-dumping & anti-subsidy measures on Chinese solar panels will expire midnight. Sept. 3 - Anadolu Agency

## **EU lifts anti-dumping measures on solar panels**

The European Commission has concluded that there are no compelling reasons to scrap definitive countervailing and anti-dumping measures on solar glass imports from China. Currently, the anti ...

the decision to impose provisional anti-dumping measures on imports of solar panels from China Good afternoon, ladies and gentlemen. I would like to inform you that the European Commission has decided unanimously to impose provisional tariffs on solar panels imported from China in order to counter the

Solar glass is a special glass used mainly, but not exclusively, for the production of solar panels. It is an essential component not just of solar panels, but of many solar energy products. This investigation has, however, no direct link with the probe related to the imports of solar panels launched by the European Commission last September

The measures are believed to remain for two year and are set to enter into force on Friday, December 6. The European Commission said that the measures would apply to the solar panels of those Chinese producers who refused to ...

The General Court confirms the validity of anti-dumping and anti-subsidy measures for imports of solar panels from China On 2 December 2013, the Council imposed anti-dumping duties in respect of imports of solar panels and key components originating in and consigned from China.<sup>1</sup> An investigation carried out by the Commission in 2012 and 2013 ...

On 6 September 2012 <sup>1</sup>, the European Commission has initiated an anti-dumping investigation into imports of solar panels and their key components (i.e. solar cells and solar wafers) from China on the basis of a complaint lodged by EU Pro Sun, an industry association on 25 July 2012 Pro Sun claimed that Chinese products were under-priced by 60 to 90 per cent ...

The EU first imposed anti-dumping and anti-subsidy measures for Chinese solar panels, wafers and cells in 2013 and extended them by 18 months in March last year, signaling that they should then end.

dumping is taking place from the country/countries concerned; material injury has been suffered by the EU industry; it is the dumping that is causing the injury, and/or; it would be against the economic interests of the EU to impose measures (which are usually in the form of an anti-dumping duty). What are the main stages of the investigation?

A dumping investigation into imports of solar panels from China was launched today by the European Commission following a complaint from a PV industry association on the basis of market distortions. It is the largest ...
