

What caused the 2023-2024 electricity crisis in Ecuador?

The 2023-2024 Ecuador electricity crisis was caused by a severe drought that depleted water levels at hydroelectric plants and a lack of capacity buildup. Ecuador experienced rolling blackouts for up to 14 hours per day in the fall crisis (started on 23 September 2024) of 2024.

Why is there a electricity crisis in Ecuador?

Several key factors intertwine to create this electricity crisis in Ecuador, unraveling the progress made in the past. Between 2007 and 2017, Ecuador invested a substantial \$11.274 billion in expanding its electricity infrastructure, primarily through Chinese financing.

Is the drought causing the energy crisis in Ecuador?

However, the drought is not the sole cause of the energy crisis. Ecuador has 1,754 megawatts of thermoelectric capacity installed, but only 853 megawatts are currently operational, unable to effectively address the situation.

Why did Ecuador stop exporting electricity to Bogota?

In Bogota, capital of neighboring Colombia, water is being rationed, and the country has stopped exporting electricity to Ecuador as a measure to avoid blackouts of its own. Ecuador faces a shortfall in energy supply of 22-to-27 gigawatt hours from this month, the presidency said.

Are electricity blackouts threatening Ecuador's economic stability?

In recent years, Ecuador has been grappling with the ominous specter of electricity blackouts, a crisis that threatens to plunge the nation into darkness and disrupt its economic stability.

Why is Ecuador unable to get electricity from Colombia?

Primicias reports that Colombia, typically a source of electricity imports to Ecuador during shortages, has also been grappling with its own drought-related electricity supply issues. Initially, Colombia covered 10% of Ecuador's electricity demand, but it later restricted sales due to its own drought problems, leaving Ecuador with limited support.

Ecuador is experiencing significant electricity shortages, with daily power outages lasting up to 14 hours in major towns such as Quito (population 2 million), Guayaquil (population 2.3 million), Cuenca (population ...
