With electric cars gaining in popularity, AEP Ohio and Walmart premiered the region's first free, public EV charging station at the Walmart Supercenter/Sam's Club at 3900 Morse Road, Ohio. The Blink charging station was developed by San Francisco-based ECOTality, Inc., a provider of clean electric transportation and storage technologies.

In the past few decades, electricity production depended on fossil fuels due to their reliability and efficiency [1]. Fossil fuels have many effects on the environment and directly affect the economy as their prices increase continuously due to their consumption which is assumed to double in 2050 and three times by 2100 [6] g. 1 shows the current global ...

The electric network needs more complex management and control than that employed by conventional fixed ES stations, as huge ES units (ESUs), and charge points are usually distributed in an inadvertently disordered form. Meanwhile, communication technology facilitates various modes of operation, including vehicle-to-vehicle (V2V), vehicle-to-home ...

The goal of "carbon peak and carbon neutrality" has accelerated the pace of developing a new power system based on new energy. However, the volatility and uncertainty of renewable energy sources such as wind (Kim and Jin, 2020) and photovoltaic (Zhao et al., 2021) have presented numerous challenges. To meet these challenges, new types of energy storage ...
