

Pulse Clean Energy has launched a new battery storage facility in Aberdare at part of a £175m investment programme. The energy storage and grid stability specialist acquired what was originally a diesel power ...

What Northvolt's bankruptcy means for Europe's battery ambitions. ... Inside Energy Dome's energy-storage-as-a-service plans. Bianca Giacobone. Jan 27, 2025. News. Earth AI's play in the hunt for critical minerals. Lisa Martine Jenkins. Jan 27, 2025. Podcast. The climate-ag grab bag.

Sweden-headquartered battery developer and manufacturer Northvolt AB has filed for bankruptcy protection in the U.S. The company will seek to restructure under Chapter 11 of the bankruptcy code. The company also announced that Peter Carlsson will step down as CEO and transition into a role as Senior Advisor.

Delays in product development, high commodity prices and investors pulling out were behind some of the most recent bankruptcy events in the ESS battery technology space, which ...

ENERGY-HUB is a modern, independent platform for sharing information and developing the energy sector, merging academic, scientific, technologic and private sector. European battery company Northvolt has filed for Chapter 11 "reorganisation" bankruptcy in the US, which it said will allow it to restructure its debt to continue scaling the business.

MACSE auction: A game changer for Italy's energy storage sector With the first auctions for procuring new storage capacity in Italy expected in the second quarter of 2025, Aurora Energy Research has analyzed the ...

Delays in product development, high commodity prices and investors pulling out were behind some of the most recent bankruptcy events in the ESS battery technology space, which include Nilar, AMTE and Ambri.

High-entropy battery materials (HEBMs) have emerged as a promising frontier in energy storage and conversion, garnering significant global research interest. These materials are characterized by their unique structural properties, compositional complexity, entropy-driven stabilization, superionic conductivity, and low activation energy.

Slowing down production can improve the quality of cells, Hans Eric Melin, founder of consultancy group Circular Energy Storage (CES), that tracks recycling data in the lithium-ion battery market ...

Battery energy storage systems (BESSs) have become increasingly crucial in the modern power system due to temporal imbalances between electricity supply and demand. The power system consists of a growing number

of distributed and intermittent power resources, such as photovoltaic (PV) and wind energy, as well as bidirectional power components ...

The transformation is clear - energy storage has established its role in the energy system and is moving to mainstream adoption. By 2025, global energy storage capacity is expected to exceed 500 GWh, driven by renewable energy integration, grid stabilisation needs and growing concerns about resilience.

He claimed it has ultra high energy density, exceptional safety standards and flexible module design. The BESS has an energy storage capacity of 2.3MWh and a nominal voltage of 1200V, with a voltage range from 800V ...

The recent bankruptcy of the battery maker Northvolt is rattling companies counting on the Swedish firm as a customer or supplier. Some companies that were planning ...

Today, the U.S. Department of Energy's (DOE) Loan Programs Office (LPO) announced a conditional commitment to Eos Energy Enterprises, Inc. (Eos) for an up to \$398.6 million loan guarantee for the construction of up ...

Northvolt AB produces lithium-ion, lithium-metal and sodium-ion cells for e-mobility and energy storage, amongst other purposes. The company's flagship battery gigafactory, Northvolt Ett, is ...

The Swedish battery technology company has been swimming in turbulent waters for some time now, marked recently by the bankruptcy of their subsidiary, Northvolt ...
