

Household battery specifications and models

What size batteries are labelled?

Size C batteries may also be marked as LR14, MN1400, or MX1400. D batteries are labelled as LR20, MN1300, or MX1300. 9V batteries are referred to as 6LR61, PP3, MN1604, or MX1604. Understanding the various labels helps you locate the batteries you require! AA Batteries are the most popular, sometimes called "double A" batteries.

What size battery do I Need?

The most common battery sizes are probably the ones you already use. Alkaline batteries come in 5 standard sizes: AAA, AA, C, D, and 9V. We highly recommend Jackery Explorer 500, 1000 v2, and 2000 Plus with different capacities to charge your appliances in various scenarios. A battery is powered by converting chemical energy into electrical energy.

What is a standard alkaline battery?

Alkaline batteries account for 80% of battery sales in the UK. Standard alkaline batteries can sometimes be confused due to the different numbering systems used. Size AA is referred to as LR6, MN1500, or MX1500. Size AAA corresponds to LR03, MN2400, or MX2400. Size C batteries may also be marked as LR14, MN1400, or MX1400.

What are the different types of batteries?

The most common battery types - Alkaline, NiMH, and Lithium- serve different purposes. A battery's ability to hold energy generally rises with its size. Therefore, even if the 1.5V rating of both the big and small batteries is the same, the large battery has a higher capacity and a longer lifespan.

What is a typical UK battery size?

The typical UK types are readily identifiable due to their prevalence. The measurements at the base of the tapered terminal are 17.5mm for the negative post and 19.5mm for the positive terminal. It's essential to understand the various battery sizes available in the UK when selecting the right power source for your devices.

What size is a 9v battery?

Size AA is referred to as LR6, MN1500, or MX1500. Size AAA corresponds to LR03, MN2400, or MX2400. Size C batteries may also be marked as LR14, MN1400, or MX1400. D batteries are labelled as LR20, MN1300, or MX1300. 9V batteries are referred to as 6LR61, PP3, MN1604, or MX1604.
