

# How to charge a small battery for home use

How do you charge a car battery?

You can either do this with the car battery in situ, or you can take the battery out first. Battery chargers are fairly self-explanatory: connect the '+' and the '-' to the battery terminals and turn the charger on. Most have lights to tell you the state of charge and when the battery is full.

How do I choose a battery charger?

Pick a charger that is appropriate for your battery and purposes. Most chargers will work for all types of batteries except Gel Cell batteries. There are fast chargers that can charge your battery quickly or even provide you with a jump start, as well as "trickle" chargers that provide a slow but longer lasting charge.

How do you charge a rechargeable battery?

Rechargeable batteries are most often charged in an A/C adapter, which you can plug into a basic home outlet. These chargers feature terminals sized in a variety of ways, from AAA to D. Depending on what kind of batteries you want to charge, you can usually find a charger appropriate for the size at any electronics or hardware store.

How long should you charge a car battery?

They include the health of the battery, the state of the mains electrics the charger's plugged into and malfunctioning electrics in the car. Regardless, charging a battery for a few hours should be enough to get the car working again. Driving for a while afterwards should finish the job.

Can You charge a car battery with a Halfords battery charger?

You can connect a Halfords car battery charger (other retailers sell them, too, from £163;20). You can either do this with the car battery in situ, or you can take the battery out first. Battery chargers are fairly self-explanatory: connect the '+' and the '-' to the battery terminals and turn the charger on.

Do you need a battery charger?

Whether you need a new battery, the car just needs a helping hand to start in cold weather, or if you inadvertently left the lights on for a few hours, a battery charger can get you back on the road again.

If the battery is nearly depleted, it will take longer to charge than if it has only a small amount of charge left. In summary, charging a hybrid car battery generally takes between 1.5 to 8 hours, influenced by the charging source and battery size.

If your main battery is fully charged, the charging system will make sure the small battery is charged as well. Sent from my SM-G930F using Tapatalk MY2015 XFR IRR / Black Pack / Speed Pack / Dark Dracos / Warm Charcoal - Ivory / Spires Exhaust / lots of extras
