

How much do solar panels cost to export?

Find out which energy companies have the best rates. The amount you can get paid for exporting energy from your solar panels varies from a paltry 1p to as much as 40p per kWh. That means that if you've got solar panels, choosing the best export tariff could earn you hundreds of pounds extra in payments every year.

Can solar energy be exported back into the National Grid?

But that excess energy can be used elsewhere, by exporting it back into the National Grid, which then distributes it to wherever it is needed. The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme.

Do solar panels have a Smart Export Guarantee (SEG)?

The good news for solar panel owners is that large energy companies are obliged to pay for the excess energy that is exported, under the Smart Export Guarantee (SEG) scheme. What is the Smart Export Guarantee?

What is a solar export tariff?

A solar export tariff pays you for all the electricity you send to the grid. At first, solar export tariffs were created in response to the government launching the Smart Export Guarantee (SEG) in 2020.

Should you sign up for a solar export tariff?

Signing up for a solar export tariff is the best way to profit from the excess electricity your solar panels generate. If you choose one of the top tariffs, you can make hundreds of pounds by selling electricity you weren't going to use anyway - and help make the grid greener.

Do I need a battery if I export solar electricity?

If you do have a battery, but you're on a standard export tariff without time of use pricing, you'll simply want to ensure you use as much of your solar electricity as possible, as this will be more valuable to you than exporting it.
