

# How to make a blade power cord using batteries

How do you connect a battery to a cord?

Needlenose pliers were helpful for me on this step. 2. Attach thin strips of duct tape around the cord, right by where the cord enters the accessory connector. 3. Strip the ends of the extension cord's wire. The tool's leads to connect to the battery are not at the base of the battery connector: they're on the sides, near the top.

How to use a battery tool?

Took batteries out of a pack, attached a cable, connect it up with the lamp, works great. the voltage is easy, you should be able to use the voltage of a fully charged battery, for example around 14.4V for the 12V tool. The problem is, that battery tools can draw a lot of current from their batteries.

How do you charge a corded Charger?

Easy way to do this: run some aluminum foil or a wire to the point of connection between battery leads and charger. On most modern chargers, you'll need to put a discharged battery in the charger before you can provide any current to the tool. I tried this, and my corded adaptor would stop working whenever the battery became fully charged.

How do you connect a power cord to a tool?

1. Push, pull and otherwise force the wire through, with the AC prongs facing the bottom (you'll connect these to the extension cord when you want to run power to the tool). Needlenose pliers were helpful for me on this step. 2. Attach thin strips of duct tape around the cord, right by where the cord enters the accessory connector. 3.

What type of cable does a power supply use?

The cable exiting the battery and connector of the DC outlet from the power supply are made from an standard 120VAC wall plug. The plug and cable was selected for ease of availability and to allow me to use a standard extension cable if needed. For my case, I will be the only individual using this setup.

How do you charge a power tool?

So, you need something to get your wires up into the tool and touching the tool's battery leads. You'll need something for the other end of the DC-carrying extension cord to attach to, and this something will be an AC outlet connected to the charger.
