

Install a solar panel in a residential building

How do I install a solar panel?

Installing your solar panel is a straightforward process though calling in professional installers is recommended. Making sure these installers are accredited by MCS is highly important, so as to ensure a high standard of installation. A step-by-step explanation of the simple solar panel installation process.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Do I need permission to install a solar panel?

Generally, any solar panel installation under 1MW is permitted without any additional approval required. Similarly to domestic installations, for no permission to be requested, there are several regulations to be met for commercial solar panel installations.

What is needed to install solar panels on UK homes?

Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Can solar panels be installed on a roof?

Building regulations require solar panels to only be installed if there is structural integrity. This clearly states that the roof must be examined to confirm it can hold solar panels. An installer is essential to check the weight of the solar panels that will be supported by the roof.

Can a solar panel be installed on a house?

Though this type of solar panel is typically seen on farmland or fields, it is still a possibility for your domestic property. Ground-mounted solar panels are usually installed when you don't have the roof space, or your property is completely sheltered from the sun all year round.

The installation of solar panels and equipment on residential buildings and land may be "permitted development" with no need to apply to the local authority for planning permission. There are, however, important limits and conditions, detailed on the following pages, which must be met to benefit from these permitted development rights.
