

Should landlords lease land for solar farms?

With the reduced cost of solar panels and high performance of rental incomes, solar farms offer some great benefits for landlords. This article looks at the various benefits for landlords considering leasing land for solar farms and gives an overview of the current solar energy market.

How do I lease solar panels?

You can also lease the land to a company, university, or municipality that purchases the solar panels outright. Or you can lease your land to a solar developer like Verogy, who owns the solar panels and sells the energy to a company, university, or municipality through a power purchase agreement (PPA).

What is your land worth if you lease solar panels?

Learn what your land could be worth if you lease it for solar panels today. Acreage Requirements: Generally, 30 acres is ideal for utility-scale solar farms, while smaller parcels (5-10 acres) suit community solar farms. Each 1 MW of capacity typically requires about 2 acres.

Can I lease a solar acreage?

Since most solar leases are paid on a per acre per year basis, the larger your parcel is, the more you could make when you lease your land to a solar developer. Not all of your acreage may be suitable for solar panels. Exclusion zones can be thought of as land that solar equipment cannot be placed on for one reason or another.

How do I choose a solar panel farm?

First, take a look at your land. If it's a flat, open space that's 20 to 25 acres, your land is a good candidate for an average-sized solar panel farm. You should also know that once a solar developer installs the solar panels, they'll have very little impact on the physical state of your land.
