

Why did lead prices rise in China in 2024?

In China, lead prices experienced an upward trend in the first half of 2024. This increase was primarily driven by a significant decline in the supply of lead, with reduced domestic production from both primary and secondary sources. Imports of lead concentrates into China also fell sharply, leading to tighter market conditions. Lead Price Chart

Why did lead prices rise 4% in December?

As stockpiles declined, refined lead prices jumped almost 4% in the final week of December, but lead prices had already achieved their peak. Several smelters of this metal were executing maintenance operations, resulting in smaller ingot inventories.

Will lead price decline in next quarter?

Analyst Insight According to Procurement Resource, the price of Lead is expected to witness a declining momentum in the next quarters, with rising skepticism of the downstream battery industries over its usage in the sector and the influx of excessive supply of the commodity in the market.

Why are lead prices rising in Asia?

Asia In Asian countries, the price trend of lead registered a significant improvement as compared to previous quarters. The surge in market prices during the initial phase of H2 of 2023 was based on the rise in demand from the downstream lead battery industries and the automotive sector.

How did lead prices change in North America?

In North America, lead prices followed a similar downward trajectory. The market was affected by reduced usage of refined lead metal, particularly in the United States. The slowing demand in key sectors, such as automotive batteries, added to the downward price pressure.

Why did lead ingot prices rise in 2020?

In 2020, average lead ingot prices were recorded at 2135 USD/MT in China. Because of increased output in the automobile sector, which pushed demand for new batteries, domestic lead scrap and ingot prices in India climbed by 1-3% in August 2020. A 3% increase in formal three-month LME prices to 1,981 USD/MT also helped strengthen domestic pricing.

Graph and download economic data for Producer Price Index by Industry: Battery Manufacturing: Storage Batteries, Lead Acid Type, BCI Dimensional Size Group 8D or Smaller (PCU3359113359111) from Dec 1984 to Dec 2024 about lead, metals, manufacturing, PPI, industry, inflation, price index, indexes, price, and USA.

Graph and download economic data for Global price of Lead from Jan 1990 to Dec 2024 about lead, World,

metals, price, aluminum, ore, iron, copper, nickel, zinc, and tin.

SHANGHAI, Dec 21 (SMM) - Experts said that copper, zinc, aluminium and lead prices will stabilise in the next one or two quarters after keeping rising for most of the year in 2021. Global metal prices will face downward pressure amid concerns about inflation all over the world, the interest rate hike cycle adopted by central banks and slowing of the industrial activity from its ...

2 ???&#0183; Non-ferrous metals LME participants can trade and take or make delivery of aluminium, copper, tin, nickel, zinc, lead, aluminium alloys and premiums. Non-ferrous prices discovered on our platforms are used as the ...

Recent technical developments in battery energy storage, coatings, castings and chemical applications of lead and zinc will be reviewed together with the influence of ...
