We investigate Norwegian adopters' preferences, values, and motivations for choosing a battery electric vehicle. The main data source is a yearly survey between 2015 and 2020 amongst Norwegian ...

Volvo Penta has bought a 60 percent stake in Norway's ZEM AS. The purpose of the purchase is to get batteries and knowledge about electrifying shipping. Volvo Penta is expanding its capabilities, expertise and product portfolio by becoming a majority shareholder in ZEM AS, a Norwegian supplier of marine battery and electric drive solutions.

The three Norwegian partnering companies will explore sustainable and efficient methods of production and will collaborate to reach short- and long-term sales agreements.

Sales of internal combustion engine (ICE) models were well and truly in the minority, with only 257 diesel models sold and 63 petrol models, accounting for 2.2 per cent and 0.5 per cent, respectively. Remarkably, the ...

Shares of Amara Raja Energy & Mobility Ltd. rose to a three-week high on Friday after it increased its stake in Norwegian battery technology company, InoBat AS. India's leading battery manufacturer has invested EUR20 million to acquire an additional 4.5% stake in InoBat AS, taking its total holding in the Norwegian firm to 9.32%, according to an exchange ...

This accelerated the sales and the adoption of battery electric vehicles (BEVs), as data on new vehicle registrations in 2022 (year to date) show that 83.7% of new registrations are BEVs [2].

This article will introduce the top 10 battery manufacturers in Norway, such as Morrow, FREYR Battery, and TECO 2030. These companies have made significant ...

In November alone, 10,940 new BEVs were sold and registered in Norway, a market share of 93.6 per cent. And, with 154 plug-in hybrid EVs (PHEVs) sold during November accounting for a market share of 1.3 per cent, that means that only 5.1 per cent of all new cars sold in Norway in November were without a charging connection.

battery electric vehicles in new car sales numbers. We investigate Norwegian adopters' preferences, values, and motivations for choosing a battery electric vehicle. The main data source is a yearly survey between 2015 and 2020 amongst Norwegian electric vehicle drivers. The motivation of the

Together with our Nordic neighbours, Norway is part of an emerging Nordic battery value chain that will support the European battery industry by reducing the carbon footprint of ...

In the second quarter, the share of Chinese brands in all Norwegian EV registrations reached 10.6 percent, up 6.9 percentage points from the same period last year, according to the note. Among the Chinese brands ...

The biggest brands by market share after Tesla were Toyota (7203.T) with 12.4 per cent, up from 8.0 per cent, and Volkswagen (VOWG_p) with 10.8 per cent, down from 11.6 per cent. The Tesla Model Y, a mid-size ...

Baggage with installed lithium batteries: non-removable batteries. Batteries must contain no more than 0.3 g lithium metal or for lithium ion must not exceed 2.7 Wh. Permitted as checked or carry-on. Removable batteries: Batteries must be removed if baggage is to be checked in. Removed batteries must be carried in the cabin. Permitted as ...

Battery electric vehicles are more energy efficient, pollute less and emit fewer greenhouse gases than vehicles powered by fossil fuels. Plug in hybrid vehicles are in a mid-position, capable of prolonged driving in electric mode with electricity charged from the grid or the use of fossil fuel in an internal combustion engine. A survey of over 8000 vehicle owners show ...

The three Norwegian partnering companies will explore sustainable and efficient methods of production and will collaborate to reach short- and long-term sales agreements. "We are honoured and delighted to partner with Morrow ...
