# Notice about residential solar energy

Are solar panels a legal requirement for new homes?

Even though installing solar panels on new builds is a great way to set new homes up with renewable energy from day one, it's not yet a legal requirement. One common problem is that developers don't use all the available roof space, resulting in a less effective solar panel system.

Should a new home require solar PV panels?

The 2023/24 consultation on the detailed specification for the FHS sought views on whether to require solar photovoltaic (PV) panels for new homes. Solar PV generation turns the sun's energy into electricity. Option 1 would have required solar PV panels covering the equivalent of 40% of a new home's ground floor area.

What is the private members' bill on new homes (solar generation)?

This Library briefing provides an overview of the bill and key areas of debate. The Private Members' Bill on New Homes (Solar Generation), sponsored by Max Wilkinson (Lib Dem), will have its second reading on 17 January 2025. The government has set a mission to make Britain a clean energy superpower.

When does the new homes (solar generation) Bill 2024-25 come out?

The New Homes (Solar Generation) Bill 2024-25 has its second reading on 17 January 2025. This Library briefing provides an overview of the bill and key areas of debate. The Private Members' Bill on New Homes (Solar Generation), sponsored by Max Wilkinson (Lib Dem), will have its second reading on 17 January 2025.

How can the government support the installation of solar panels?

The government has several schemes to support the installation of solar panels. This includes the Energy Company Obligation(ECO), and the Warm Homes: Local Grant and the Warm Homes: Social Funding.

Are solar panels allowed on a property?

Certain conditions must be met for permitted development rights for solar panels which include: Panels must not protrude more than 200mm from the roof. This helps to protect the appearance of the building. The solar panels must not affect the structure of the roof or the appearance of the property.

Residential Renewable Energy Solutions (RRES) is a program that gives you the opportunity to sell the power you generate with your residential solar installation and any renewable energy certificates (RECs) to us. Note: Customers who installed solar before January 1, 2022, are participating in the Net Metering Program.

Residential Consumer Guide to Solar Power - In an effort to make going solar as effortless and streamlined as possible, the Solar Energy Industries Association developed this guide to ...

Solar panels are roof-mounted systems that capture the sun's energy, converting it into electricity for your home. More people are investing in them than ever - with over 1.4 million...
