In this work, Babics et al. report the outdoor performance of a perovskite/silicon tandem solar cell during a complete calendar year. The device retains 80% of its initial efficiency. Local environmental factors such as temperature, solar spectrum, and soiling strongly affect tandem solar cells" performance.

In this dwg category there are files useful for the design of a photovoltaic system, solar systems, solar panels designed with autocad, solar panels for the production of electricity.
