

Do portable chargers give a lot of power?

Portable chargers don't always give as much power as they promise which is why we test with real devices. Some couldn't even power one full charge. Power banks aren't very portable if you're waiting six hours for them to charge before heading out.

Does a rechargeable power bank have a lithium-ion battery?

Nearly every rechargeable power bank you can buy (and most portable devices) contain a lithium-ion battery. These beat other current battery types in terms of size-to-charge capacity, and have even increased in energy density by eight fold in the past 14 years.

Should you buy a portable battery or power bank?

Watching your phone or tablet steadily run out of power when you're nowhere near an outlet is stressful. But there's an easy solution: a portable battery or power bank. These are available in many sizes and capacities, and can include lots of handy features like fast charging and multiple ports.

Does a power bank have pass-through charging?

If a power bank has "pass-through charging," it is able to take in and distribute power at the same time. Pass-through equipped power banks can charge devices while plugged into a wall charger -- a handy feature when you're in a hurry.

Does a power bank have wireless charging?

Some larger power banks are equipped with wireless charging capability. On this list, both the BioLite Charge 100 Max and Goal Zero Sherpa 100 PD come with a wireless charging pad that can deliver up to 15W of power to compatible devices. In general, wireless charging from a power bank will be slower than using a cable.

Can a power bank charge a laptop?

Power banks that can charge a laptop are a category unto themselves. I recently put together a guide to those high-capacity portable chargers and Lion Energy's Eclipse Mag made the cut as the best option for traveling with your laptop -- but it's also great for smaller devices.
