

## Precautions for valve-regulated battery packs

Are batteries regulated or hazardous substances?

Under normal use and handling the customer has no contact with the internal components of the battery or the chemical hazards. Under normal use and handling these batteries do not emit regulated or hazardous substances. SECTION 313 (40 CFR 372) LISTED TOXIC CHEMICALS ARE PRECEDED BY AN \*.

Are Liberty batteries hazardous?

HAZARDOUS POLYMERIZATION WILL NOT OCCUR. The "Liberty Series" batteries are sealed, recombinant design. Under normal use and handling the customer has no contact with the internal components of the battery or the chemical hazards. Under normal use and handling these batteries do not emit regulated or hazardous substances.

Are UPS battery center batteries regulated?

UPS Battery Center batteries meet the test requirements for "nonspillable wet electric storage batteries", as provided in 49 CFR 173.159(d), and therefore are non-regulated by DOT, for surface transportation, when protected against short circuits and securely packaged. (These data refer to undamaged batteries).

Can lead acid batteries be installed in an airtight enclosure?

However, if subjected to excessive over-charge voltage, hydrogen and oxygen can be vented into the atmosphere. Therefore, lead acid batteries should never be installed in an airtight enclosure. Sufficient precautions must be taken to prevent excessive overcharge and containment of potential explosive off gases.

Do non-spillable Batteries leak?

Non-spillable batteries are sealed and do not leak or vent gasses under normal conditions. Venting of sulfuric acid gas and hydrogen can occur under severe overcharge conditions. During lead reclaim operations, or if battery is ruptured or damaged, exposure to sulfuric acid electrolyte and lead can occur. Sulfuric acid electrolyte.

How do you protect a battery if a case is damaged?

Use acid-resistant gloves to handle battery if case is damaged. An acid-resistant apron is also recommended for large clean-up operations. When concentrations of sulfuric acid mist are known to exceed PEL, use NIOSH or MSHA approved respiratory protection.

Tel: +886-2-2880-5600 Mail: service@csb-battery.tw -BATTERY M REV MAY 20 24 VRLA Battery User Manual Introduction As a world leading manufacturer of Valve Regulated Lead-Acid (VRLA) batteries, CSB's products are utilized in over 52 countries in telecommunications, UPS, emergency lighting, security and more.

## Precautions for valve-regulated battery packs

Wear protective gloves/protective clothing/eye protection/face protection. Avoid breathing dust/fume/gas/mist/vapors/spray. Use only outdoors or in a well-ventilated area. Do not ...

Product name: Valve regulated lead-acid battery (PP Non-Flame retardant) Company name: GS Yuasa International Ltd. Page 1 / 19 Date of revision: 2020/4/20 Latest confirmation date: 2020/4/20 ... Precautions for the environment : Be careful to not discharge the product into the rivers, sewer, and soil.

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1053) Components Type Value Lead (CAS 7439-92-1) TWA 0.05 mg/m<sup>3</sup> Valve Regulated Lead-Acid Battery - Absorbed Glass Mat (VRLA/AGM) SDS US 962666 Version #: 01 Revision date: - ...

The battery shall be fully charged per the manufacturer's instructions during startup and shall demonstrate the specified operating time. 1.1 Matching Battery Power Pack . The battery power pack shall consist of sealed, valve-regulated batteries, a circuit breaker for isolating the

For charging the valve-regulated lead-acid battery, a well-matched charger should be used because the capacity or life of the battery is influenced by ambient temperature, charge voltage and other parameters. (1) Main Power (Cycle use) Cycle use is to use the battery by repeated charging and discharging in turn. (a) Constant voltage charging ...

When paralleling valve-regulated batteries is necessary, the external circuit resistance should be matched for each battery. A wide variation in battery circuit resistance can result in unbalanced discharge (i.e., excessive discharge currents in some batteries and less discharge in others).

Personal Precautions: Acid resistant aprons, boots and protective clothing. ANSI approved safety glasses with side shields/face shield recommended. Environmental Precautions: Lead and its ...

7.1 Precautions for safe handling liquid to water while stirring to prevent release of heat, steam and fumes. Wear appropriate personal protective quipment, avoid direct contact. Do ot get in ...

Valve-Regulated Lead Acid batteries destined for recycling can be managed under the federal Universal Waste Rule codified at 40 CFR Part 273. In the event of disposal, dispose only in ...

CONCORDE BATTERY VALVE REGULATED LEAD ACID BATTERY SAFETY DATA SHEET  
SECTION 1 - CHEMICAL PRODUCT AND COMPANY IDENTIFICATION Product Name: Valve Regulated Sealed Non-Spillable Lead Acid Battery PRODUCT USE: Electric Storage Battery  
MANUFACTURER'S NAME: CONCORDE BATTERY CORPORATION EMERGENCY ...

Under 49 CFR 171.8, individual packages that contain lead metal (<100 micrometers) below the reportable quantity (RQ) are not regulated. Under 49 CFR 171.4, except when transporting ...

## Precautions for valve-regulated battery packs

Valve-regulated lead-acid battery. Valve-regulated lead-acid battery is the current dominant technology in E2Ws. In 2005, it is estimated that 95% of E2Ws produced in China used VRLA. VRLA battery packs consist of three to four 12 V modules (12, 14, or 20 Ah capacity) for a total voltage of 36 or 48 V and energy capacity of 0.4-1 kWh ...

Valve Regulated Lead Acid Battery Revision Date 15-Aug-2022 Page 4 / 12 Methods for Cleaning Up Dispose of in accordance with local, state, and national regulations. Precautions for safe handling Advice on Safe Handling Handle batteries cautiously. Do not tip to avoid spills (if filled with electrolyte). Avoid contact with internal components.

Tel: +886-2-2880-5600 Mail: service@csb-battery.tw -BATTE RY M REV DE C 2024 VRLA Battery User Manual Introduction As a world leading manufacturer of Valve Regulated Lead-Acid (VRLA) batteries, CSB's products are utilized in over 52 countries in telecommunications, UPS, emergency lighting, security and more.

Environmental precautions Avoid allowing material from exposed battery to contaminate soil, sanitary sewers, or waterways. 7. Handling and storage Do not allow conductive material to touch the battery terminals. A dangerous short-circuit may occur and cause battery failure and fire. Protect against physical damage. Do not open,
