Can EV batteries be used in low-range electric vehicles?

Theoretically, both EV automakers and aftermarket equipment manufacturers should be able to manufacture high-cost, long-range batteries you could have swapped into most low-range electric vehicles. This is because many vehicles that offer multiple battery capacities still make all their battery packs the same size, physically.

Why do electric vehicles need a battery upgrade?

The high-voltage battery pack is the heart of any electric vehicle. An electric vehicle's range and performance are both dictated by what can be delivered by the HV battery. Battery upgrades are therefore the key to allowing existing electric vehicles to become far better than they ever were, even when new.

Can EV rides upgrade your Nissan Leaf battery pack?

EV Rides has developed a procedure to upgrade to larger, pre-owned Nissan batteries into low-range Leafs—thus increasing their range. Alternatively, if your Nissan Leaf's battery pack has declined considerably EV Rides can swap your degrading battery pack out for a similarly-powered but less worn pack.

How much does a EV ride battery cost?

The largest used battery EV Rides currently offers is a 62 kWh pack. With 90% capacity left it will run you between \$15,500-\$18,500 and offer you 230-240 miles of range. At the moment, EV Rides is also offering a brand new 40 kWh battery option for 2013-2015 Nissan Leafs. It should cost about \$14k and offer up to 170 miles of range.

Can EV batteries increase range?

But as EVs are relatively new, mechanics have only developed a good system for upgrading EV batteries—and thus increasing range—for the Nissan Leaf and Tesla's vehicles. Can you upgrade your Nissan Leaf's battery pack and increase its range? The Nissan Leaf is one of the only EVs with an upgradable battery pack—according to Life Wire.

What battery size does EV rides offer?

EV Rides only offers one battery size for 2011 and 2012 Nissan Leaf EVs. A 24 kWh battery should set you back \$6k-7k and offer a 70-85 mile range. 2013 through 2017 used Nissan Leaf owners have many more battery options. The largest used battery EV Rides currently offers is a 62 kWh pack.

Muxsan are fitting the battery modules from VW GTE in addition to the existing Nissan battery pack. The downside is that you lose a small amount of space in the load area ...

We offer full-stack self-developed battery cells, BMS, and battery packs, covering both 400V and 800V platforms. Our IPS (Integrated Power System) technology achieves a maximum volume utilization rate of
