I haven't seen any RV solar installations where anyone grounded the solar panel frames so I suspect doing so should be listed as a recommendation verses a requirement however, you could run a ground wire from the panels to the frame of the RV if desired and when the RV is connected to shore power they would then be grounded (assuming a proper ...

How to Ground RV Solar Panels. How do you ground RV solar panels? Simple, most RV solar panels are automatically grounded by connecting the metal frame of the solar panels to the RV's chassis or grounding rod. The contact between the metal frame and the roof of the vehicle provides an electric path that grounds the panels above.
