

Service life of solar panels installed on roof

How long do solar panels last?

Surprisingly, solar panel lifespan has always been extremely good. Given they have no moving parts, there is rarely something that can go wrong within the solar panel itself, which means they can keep generating electricity for a very long time. However, what has improved is the level a solar panel will be performing at after 25 years of usage.

How often should solar panels be replaced?

One way to keep your solar system operating at its peak is to sync up your roof maintenance with solar panel maintenance and replacement. Depending on roof shingle types, a typical roof needs to be replaced about every 25 years, which is the perfect time to potentially replace your solar panels.

Should I replace my roof after installing solar panels?

The last thing you would want is having to replace your roof after installing solar panels. Removing and reinstalling a solar panel system is a complex procedure, and in many cases, you will void warranties. Ideally, solar panels should be installed on roofs that will not need a replacement during the next 25-30 years.

How long do solar inverters last?

Solar inverters have a typical service life of 10 years. This means your solar panels will still have 15 years of guaranteed power output when your first inverter reaches the end of its service life. If you're considering a solar power system with energy storage, home batteries also have a typical service life of 10 years.

Are solar shingles a good option for a new home?

Unlike solar panels, which are installed above your roof with a racking system, solar shingles and tiles become a part of the roof. These products can be a great option for new homes, since you combine your roof and solar array into a single system, reducing the total combined installation costs.

Do solar panels expire?

There is technically no expiration date on solar panels. However, over time, they naturally tend to become less efficient at producing energy. Some panels can also break due to physical damage from extreme weather conditions.
