Based on the battery, the automotive battery management system market is divided into lithium-ion, lead-acid, nickel-based, and others. The lithium-ion segment held 59% of the market share in 2024. From a market perspective, the primary focus for companies is innovation in battery management systems as lithium-ion batteries have started to gain traction as the fuel of choice ...

However, the price war that began in 2023 due to an oversupply of battery materials has persisted into 2024. Prices of upstream materials such as LFP cathodes, lithium battery (LiB) copper foil, and lithium hexafluorophosphate continue to decline, significantly impacting supplier profitability.
