

How much does a solar panel installation cost?

Generally, two installers will work together to install your solar panel system, and depending on its complexity, they can take up to 3 days to complete the installation. This means that you can expect to spend anywhere between £600 and £3,000 on labour costs alone.

How much do solar panels cost in the UK?

As a guide, the average cost of solar panel installation in the UK is usually somewhere in the region of £8,000 for a 4kW photovoltaic (PV) system. If you're looking for commercial solar companies near you for a larger installation, expect to pay more. Does your work come with a guarantee?

How much does a solar panel cost per kilowatt?

Exactly how much a solar panel costs per kilowatt depends on the type of solar panel you're talking about. Monocrystalline solar panels are the most expensive, and their cost per kW is somewhere around £1,000 - £1,500 whereas polycrystalline solar panels cost about £900 per kW.

How much does a photovoltaic system cost?

Our estimators are Chartered Members (MRICS) of the Royal Institution of Chartered Surveyors and Members of the Chartered Institute of Building (MCIOB). A 4kW photovoltaic (PV) system, suitable for a 2-3 bedroom house typically costs around £8,000 (incl. installation). Including an inverter and solar battery takes the average cost to around £12,000
