

Are solar carports a good investment?

Solar carports can be used to offset rising energy costs and deliver savings every year for distribution companies all over the UK. In addition, installing EV charging points along with the carport offers an additional revenue stream and may help to increase customer dwell time.

What are integrated solar carport solutions?

Our integrated solar carport solutions reduce customer energy costs, provide premium car parking facilities, and offer revenue generation opportunities from charging infrastructure, advertising, and electricity grid services from a renewable energy source.

What is a commercial solar carport?

A range of heavy-duty commercial solar carports, suitable for car parks in excess of 20 spaces, and typically over 100 spaces. A range of lighter duty aluminium carports particularly suited for smaller commercial carport projects, with a flexible design making it suitable for small car parks, starting from just two spaces.

What is a flexisolar T-frame solar panel carport?

FlexiSolar T-Frame Solar Panel Carports combine minimal ground footprint with an extremely robust construction and specifically a framework that allows your customers and staff to open car doors unhindered. Each vertical post is positioned up to 7.5m apart with a typical 3 bay span.

What are the different types of solar powered carports?

We offer two main types of solar powered carports, T-Frame and V-Frame, both have distinct advantages and applications and come with a wide range of options to choose from to suit your specific requirements.

Why do you need a solar carport?

A solar carport will generate renewable energy onsite to help offset your electricity costs and reduce your overheads. Or provide customers and staff with a safe and dry place to park their vehicles while they shop, work or relax.
