

Solar Rechargeable Battery Replacement Video

Do solar lights need rechargeable batteries?

No. Do not use regular alkaline non-rechargeable batteries unless you're just testing the LED in your solar lights. Other than that, always make sure to use rechargeable solar light batteries. If you use a standard alkaline non-rechargeable battery, the solar light will attempt to recharge the alkaline battery.

How do I replace the batteries in my solar lights?

To start replacing the batteries in your solar lights, pick the right spot to work. It's best to find somewhere that's both clean and dry. A tidy space means you won't lose any small bits like screws when you take the light apart. This keeps everything organized and makes the whole process of swapping out the batteries a lot smoother and quicker.

How to change battery in solar post light?

You can change the batteries in most solar lights by opening the battery compartment and replacing the old batteries with new, compatible ones.
