A solar charge controller (or solar panel regulator) is an essential component of most solar charging systems over 10W. A charger controller protects your battery from overcharging and protects your panel from reverse current flow. If it has a low voltage disconnect (LVD) facility, a controller will protect the battery from draining. ...

As the name suggests, a solar charge controller is a component of a solar panel system that controls the charging of a battery bank. Solar charge controllers ensure the batteries are ...

1. REDUCING THE VOLTAGE OF YOUR SOLAR PANEL. Without a controller between a solar panel and a battery, the panel would overcharge the battery by generating too much voltage for the battery to process, seriously damaging the battery. Overcharging a battery could result in the battery exploding! 2. MONITORING THE VOLTAGE OF YOUR BATTERY
