

Solar monocrystalline silicon wafer China price

How much does a monocrystalline silicon wafer cost in China?

The China Nonferrous Metals Industry Association (CNMIA) said that prices for monocrystalline silicon ranged from CNY 222 (\$32.30)/kg to CNY 248/kg last week, up 31.37% from the middle of January. Longi, meanwhile, has raised its wafer prices by more than 15%.

How much does monocrystalline silicon cost in China?

It said that the prices for the raw material ranged from CNY 230/kg to CNY 250 last week, and noted that prices for monocrystalline silicon ranged from CNY 222/kg and CNY 248/kg, up 31.37% from the middle of January. The organization said that the average price of monocrystalline silicon has now hit CNY 235/kg.

Are silicon wafer prices falling in China?

On 29 October China's Silicon Industry branch released its latest spot prices for silicon wafers, indicating that monocrystalline silicon chip prices slightly decreased over the reporting period.

Why did silicon wafer prices fall last week?

Wafer prices fell slightly last week as cell factory utilisation rates remained low. The price of silicon wafers fell in China last weekend, offering upstream solar manufacturers some respite and hope that prices may finally begin to normalise.

What are the uses of Mono wafer?

The Mono Wafer and Solar System, Solar Panel, Solar Cell products are usually used to get more energy for specific effects. For example, soil and water can grow food, wood can be burned to provide heat or to build shelters. Minerals and energy are of major importance to the world economy.

Why did cnmia raise its wafer prices?

Longi, meanwhile, has raised its wafer prices by more than 15%. CNMIA's silicon branch has reported that polysilicon prices rose after the Chinese lunar year and will likely remain at current levels for a relatively long period, due to increasing demand from wafer manufacturers.
