

What happens if a solar EPC contractor fails to complete a project?

Solar EPC contracts generally provide fixed dates for project completion. If the contractor fails to complete on time, it will often be liable for liquidated damages (LDs), unless it is entitled to claim an extension of time to the completion date, thereby reducing or avoiding liability for LDs.

Who is responsible for a solar project in the UK?

Solar energy is expected to more than double by 2030 and will therefore continue to be a key part of the UK's decarbonisation strategy. The main parties to solar projects will often include the: Developer (employer) - who obtains planning consent and finance for the project. Contractor - who is responsible for building the solar plant.

Who is involved in a solar project?

The main parties to solar projects will often include the: Developer(employer) - who obtains planning consent and finance for the project. Contractor - who is responsible for building the solar plant. Suppliers/manufacturers - who supply key plant and equipment used in the project, including panels, inverters and transformers.

Do solar plant projects have performance issues?

While parties to solar plant projects will try to deliver complete and functioning assets, performance issues and disputes will invariably arise from time to time. Some common examples we see include issues relating to: Internal corrosion due to water ingress.

What happens if a solar project is delayed?

Previously, delayed completion could cause a solar project to become unviable due to a failure to achieve accreditation for incentive payments. In early large-scale solar projects, this failure could result in the contractor having to remove all plant and equipment and reinstate the site at its own cost.

How is expropriation based on a hypothetical Reinvestment?

This method reflects the idea that expropriation without prompt compensation has deprived investors of the opportunity of profitably reinvesting their resources. In this case, the rate is calculated on the basis of what a hypothetical reinvestment of the principal compensation would have brought.

Scholars have paid much attention to the problems existing in the land expropriation risk assessment system and the sound countermeasures from a qualitative perspective.

last decade. The nature of international compensation for expropriation indicates that the property status of the

owner must be the same before and after expropriation. In this study area, the ...
