

# Solar power generation tube installation video tutorial

How to connect a solar inverter to the grid?

In order to connect the inverter to the grid simply plug it in in the main power switch board,so that it gets power from the grid. The output wire is also connected with board that is supplying electricity in home. In order to calculate the excess energy generated from the solar system we need to install a metering device.

How to mount a solar panel?

Solar panel mounting structure should be grounded with civil work; general civil work involves 4\*4 inch foundation work. Fasteners, preferably top brand like Anchor should be used for structure fastening. Wiring of solar panel with MC4 Connector.

How a solar inverter works?

The output of a series string of solar modules is connected to the input of the inverter. Make sure the inverter is turned off while the connections are being done. In an off grid solar system,Battery is mandatory where it is used to store power backup. This battery is connected with solar inverter to recharge it with solar panel and grid.

How to calculate excess energy generated from a solar system?

In order to calculate the excess energy generated from the solar system we need to install a metering device. We need to connect the positive wire from the metering device with the line terminal and the negative wire to the neutral terminal of the inverter. After all the connections are done, we switch on the mains.

What angle should solar panels be installed?

30 DegreeInstallation of solar panels. Solar panels should be installed always at 30 degree angle to extract maximum efficiency. Angle of installation results in maximum power generation. Also,solar panels should be installing facing south-west direction. 3 Earthing stands for solar systems.

How a battery is used in an off grid Solar System?

In an off grid solar system,Battery is mandatory where it is used to store power backup. This battery is connected with solar inverter to recharge it with solar panel and grid. The positive terminal of the battery is connected with the positive of the inverter and vice versa.

Let us talk about how to install solar panels. You can use the services of an EPC installer or can do-it-yourself. Given below is the solar installation guide for an off grid solar system which is simple and easy. A prospective solar buyer can read this blog and understand how ...
