

Solar power supply no need to connect to the power supply

is Solar photovoltaic (PV) power supply systems; the section is likely to remain largely unchanged in the first amendment of the standard, due for publication in June 2011. The origins of Section 712 of BS 7671:2008 can be found in IEC 60364-7-712 as no CENELEC HD currently exists. Note that IEC 60364-7-712 is intended to provide

Energy storage is essential in off-grid PV systems to ensure uninterrupted power supply and to meet power demands when solar panels are not generating enough ...

Vmp = solar panel working voltage; Voc = solar panel open circuit voltage. So don't think that 60V is the working voltage (Vmp) Please be noted, This grid tie inverter cannot be used as off grid/stand alone solar system. The output need to be connected to the grid power. Can not supply power directly to the AC loads.

Short answer: it can prevent damage to the power supply equipment.; Long answer: When its not shorted it means that the power supply is "floating" (i.e. NONE of the terminals is connected to ground) --> thus, ...
