How do I test a power bank battery?

Connect the power bank to the battery capacity tester using a USB cable. Turn on the battery capacity tester and wait for it to detect the power bank. Follow the instructions on the battery capacity tester to start the test. The battery capacity tester will display the capacity of your power bank's battery in mAh (milliampere-hours).

How do I check my power bank battery health & capacity?

A multimeter is a useful tool that can measure the voltage and current of your power bank. To check your power bank's battery health and capacity using a multimeter, follow these steps: Turn on the multimeter and set it to measure DC voltage.

What is a battery capacity tester?

A battery capacity tester is a device that can accurately measure the capacity of your power bank's battery. To check your power bank's battery health and capacity using a battery capacity tester, follow these steps: Connect the power bank to the battery capacity tester using a USB cable.

How do I know the real capacity of a power bank?

The best way to know the real capacity of a power bank is to use a USB multimeter. The multimeter will show you exactly how much charge is transferred to a device. However, not everyone has a multimeter. So, down below we have also included a formula you can use to calculate the real capacity of a power bank and much more. Let's dig in.

What voltage should a power bank display?

A fully charged power bank should display a voltage between 4.2V and 4.4V. If the voltage is significantly lower than the expected range, it may indicate a problem with the battery. A battery capacity tester is a device that can accurately measure the capacity of your power bank's battery.

How to calculate power bank capacity using a USB multimeter?

The transferred amper (A) is the real capacity of your power bank. If the USB multimeter shows the results in A and not mAh, you can use this formula to convert it:  $A \times 1000 = \text{mAh}$ . If you don't have a dummy load, don't worry. You can calculate the real capacity of the power bank using a USB multimeter and a wall charger. Tools you need:
