What is Norway's first commercial battery factory?

Norway's first commercial battery factory Morrow plans to build a battery factory in Arendal, which will start production in 2023 and be fully operational by 2028. This will be the first commercial battery production plant in Norway.

Who is Morrow batteries?

Morrow Batteries is a Norwegian battery company with the goal of developing and producing the world's most cost-effective and sustainable batteries. Norway's first commercial battery factory Morrow plans to build a battery factory in Arendal, which will start production in 2023 and be fully operational by 2028.

What is the future of battery production in Norway?

Battery cell production is one new industry Norway is keen to enter, hoping to benefit from access to green power and proximity to European customers keen to source batteries away from China.

Why do we need batteries in Norway?

"Battery production can create new, green jobs and more export opportunities for the Norwegian economy. And that's exactly what we need right now," says the CEO of the Confederation of Norwegian Enterprise (NHO), Ole Erik Almlid. Agder Energi and Bjørn Rune Gjølsten's NOAH AS are two industrial heavyweights that are now launching Morrow Batteries.

Where is Elinor batteries based?

battery factory in Mid-Norway. Elinor Batteries plans for a giga-scale battery factory near Trondheim, Norway. Based on 100% renewable energy and Nordic mineral resources, the factory will supply sustainably produced batteries to the European Energy Storage market.

Where is Norway's first battery cell production site?

Battery start-up Morrow on Friday opened Norway's first battery cell production site on the country's south coast, with plans to deliver the first units by the end of the year and adding more production step by step.

The company bridges the gap between battery cell manufacturers and system integrators with world-leading robotic technology for automated cell stacking and battery module assembly. CHALLENGE. Today, there is relatively little battery production in Norway, which is critical for improving supply security both domestically and across Europe. ...

The Norway Spoke expects to utilize Li-Cycle's "Generation 3" technology to recycle full EV battery packs without discharging or disassembly. Li-Cycle's Spoke recycling process uses a submerged shredding method that ...
