

The fuse in the battery cabinet cannot be removed

How do I remove a 7.5 Amp Fuse?

The plastic cover and 7.5 amp fuse have been removed. The bus bar is then pryed off the stud of the battery terminal for removal to free up the battery terminal. To remove the power wire lugs from the alternator fuse and bus bar assy's, you must pry off the black plastic access panel from side of the plastic housing.

How do I find a battery fuse?

Open the fuse box with a screw driver. Compare the fuse box diagram to the actual layout inside the box. The fuse box should be laid out exactly like the diagram on the lid. Each fuse will have a number printed on top of it. Locate the one that is associated to the battery and you will have successfully located the main battery fuse to your car.

How do I remove the AMS fuse?

The plastic fuse cover over the 7.5 amp AMS fuse can be pulled off with the fuse puller Hyundai supplies inside the fuse block panel in the engine bay. Once you lift it off, you can then pull the micro blade fuse which will allow you to remove the bus bar that had the battery terminal pinned down.

How do I fix a blown battery fuse?

The fuse box should be laid out exactly like the diagram on the lid. Each fuse will have a number printed on top of it. Locate the one that is associated to the battery and you will have successfully located the main battery fuse to your car. Change the main battery fuse if it has blown to get your car back on the road again.

How do I know what fuses are Under my Fuse Box?

Most fuse boxes have a clearly labeled diagram that lets you know what fuses are under the lid. There will be a label that reads "battery" that has a number associated with it. The number represents the amps of the fuse. The number is what you will be looking for when you open the fuse box.

Is AMS fuse A J case?

Doing some further Googling tonight for a solution, I found out that AMS fuse is a J case type. It's a plug in style that are apparently very difficult to remove without damaging them. If I can get it out safely, I hope to be able to figure out how to remove the bus bar that is holding the battery terminal in place.
