What is capacitor color coding?

The use of different colors on a capacitor to show its values and characteristics is known as capacitor color coding. Related Posts: Inductor Color Codes - How To Read Inductor Value? Calculator Click on image to enlarge How to Read Color Codes for Disc & Ceramic Capacitors?

What are the color bands of capacitance?

In the following tables, the first three color bands show the value of capacitance, the fourth band as tolerance in percentage and the fifth band shows the temperature coefficient. For example: 1st Color Band = First Number of Value of Capacitor. 2nd Color Band = Second Number of value of Capacitor.

How to identify capacitor values & tolerances?

For identifying the capacitor values and tolerances international colour coding scheme (electronic colour coding) was introduced. Every capacitor has colors or alphanumeric characters on the body which indicates the nominal capacitance value of the capacitor. The capacitance can range from 1 pico factor to 1 farad.

What are the color codes for non polarized mica molded and polyester capacitors?

Color codes for non-polarized mica molded and polyester capacitors like ceramic and disc capacitors are an old school method (BS-EN 60062) and hence replaced by the capacitor marking ( BS-1852 Standard) with alphanumeric codes.

How to know the capacitance value of a capacitor?

Every capacitor has colors or alphanumeric characters on the body which indicates the nominal capacitance value of the capacitor. The capacitance can range from 1 pico factor to 1 farad. To know the capacitance values of the capacitors we need to follow this steps: How to Read Capacitor Values?

What does the marking on a capacitor mean?

Every capacitor has a special marking printed on its body. It represents the value or colour code of capacitor. There are different types of capacitor and each has its specified capacitance value, voltage rating, temperature range, tolerance and life time. But most of the capacitors have their value and their voltage printed on their body.
