

What is a solar street light system?

A solar panel is an essential component of a solar street light system as it allows the light to operate using clean, solar energy instead of fossil-fueled power. The competitiveness of solar energy as a renewable power source depends significantly on both the conversion efficiency and cost of solar panels.

What are the different types of solar street lights?

No matter which type you are considering, all types of solar street lights consist of a solar panel, lighting module and fixture, rechargeable battery, and a pole. Some premium street light products also integrate MPPT charge controller, advanced Battery Management System (BMS) and/or microwave sensor for a robust and extensive application.

What are the parts of a solar street light?

Solar street lights consist of four main parts: The solar panel is one of the most important parts of a solar street light, as the solar panel can convert solar energy into electricity that the lamps can use. There are two types of solar panels commonly used in solar street lights: monocrystalline and polycrystalline.

Are solar street lights a good choice?

Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting. Also, unlike traditional lighting, LEDs emit almost no heat, making them safer to change and more energy efficient.

Are solar street lights energy independent?

Become energy independent today with Sun-Lite. Our solar street lights use the latest LED lighting technologies to guarantee a longer lifespan for your road lighting. They also operate well in cold temperatures, making them the perfect choice for outdoor lighting.

Can solar street lights be used on a road?

In addition, solar-powered road lighting is immune to power cuts. The road will remain well-lit even if the primary grid fails. Your solar street lights will store energy internally and light up the road for travellers through every season. We can also install temporary solar lighting for use on more minor roads.
