

Which solar panel is best for your home?

Monocrystalline panels are the most expensive and most efficient but are also the most common and comprise the best solar setup for home energy. Polycrystalline panels come in second and thin-film panels are the least efficient overall. Most solar panel manufacturers provide monocrystalline systems nowadays.

What makes a good solar panel installer?

The best solar panel installers are qualified specialists who fit the hardware, offer the best workmanship and the aftercare your system needs. They will work with you to calculate how many solar panels you'll need, and then install them so well that they will generate enough energy to cover your home's needs for many years to come.

Which solar panel installer should I Choose?

We chose Project Solar as best for long warranties, Effective Home as best for industry accreditation, and Glow Green as the best range of high-efficiency panels. Which solar panel installer you choose significantly impacts your experience of integrating this green technology into your home.

Who installs the best solar panels in the UK?

Project Solar is an award-winning solar panel installation company. It's the largest in the UK, having installed more than 45,000 solar panels since its inception in 2011, and is particularly well-known for offering the longest warranties in the UK solar sector. Importantly, Project Solar installs FMB's two best solar panels.

Which type of solar panels are most efficient?

The most efficient type of solar panels are monocrystalline panels. These have efficiency ratings ranging from 20% to 25%. The efficiency of solar panels refers to the amount of sunlight converted into electricity versus the amount reflected off the panels or lost as heat.
