A non-corded garbage disposal is a type of garbage disposal that does not require an electrical outlet and instead uses a battery or another power source to operate. Unlike corded models, non-corded disposals do not need to be plugged in and can be more convenient, safer, and typically more affordable.

After the waste battery is abandoned, the battery's casing will slowly corrode, and the heavy metal substances in it will gradually penetrate into the water body and soil, causing pollution. If people eat crops produced from contaminated land or drink contaminated water, these toxic heavy metals will enter the body and slowly deposit down, posing a great threat to human health!
