

What type of battery should I buy?

Shop around for AA and AAA batteries and the main types you'll find are alkaline and lithium disposable batteries. Lithium batteries last a lot longer in more energy intensive devices. We've found that they can give you 2-3 hours more power than an alkaline battery. But they're also much more expensive.

Which rechargeable batteries should I buy?

For a busy household that's always pressing play, consider a larger set of rechargeable batteries to avoid quarrelling. HiQuick offers eight rechargeable AAAs complete with a universal intelligent battery charger that can recharge depleted batteries in three hours. Each one offers 1100mAh of power.

What makes AA batteries better?

One big improvement that has occurred with the best AA batteries over the years is in their total capacity. As battery technology has improved, so has the overall battery life, with many AA batteries now containing a lot more power, and thus a much longer lifespan, than they did years ago.

Are rechargeable batteries better than disposable batteries?

Rechargeable batteries can run for hundreds of cycles, meaning you don't have to buy and dispose of huge quantities of disposable batteries. This is much cheaper and it's better for the environment as well since battery disposal and recycling can be a carbon-intensive process.

Are best buy batteries any good?

Typically, the Best Buys are also some of the priciest batteries. However, you can save money by opting for high scoring own-brand batteries, where a pack of eight is just a fraction of the price of other Best Buys. Log in to reveal our pick of the best batteries in our tests. Not a member? Join Which? today. Last updated June 2024.
